

Compatible ladder systems RAILSTOP RS S06

The guided type fall arrester including a rigid anchorage line RAILSTOP RS S06 is part of personal protective equipment (PPE) of category III to prevent falls from heights. The RAILSTOP RS S06 in combination with a full body harness in compliance with DIN EN 361 with a fall arrester D-ring at chest height (sternal) and also a multifunctional D-ring at waist height (ventral) only serves to secure one person ascending or descending a ladder.

At the moment, the guided type fall arrester RAILSTOP RS S06 may only be used in the following tested rail guides in accordance with the user manual:

LMB arrester rail C profile
LMB arrester rail C profile CC

The two rail guides are attached to several ladder types. More ladder types may be added at any time after an amendment of the product range or new developments. At this time, the RS S06 can be used as intended and safely on the following ladders:

LMB ladder TR 280
LMB ladder TR 280-CC
LMB ladder TR 273,3
LMB ladder TR 273,3-CC
LMB ladder TR 280-3 CC

Compatibility and safety are ensured for all runners of the type RS S06 with the item number 1005331_KXXX regardless of the production date and the ladder types stated on the label.

The list should be considered a supplement to the list of matching ladder system components in the enclosed operating instructions (see page 3), and will be updated to include new ladder types/arrester rails after an intensive inspection by BORNACK.
